

How it works

- Throughout the semester, people can submit terrible data visualizations they find on the internet.
- Each time we have submissions, we will judge which one is the worst.
- The worst data visualization from that round will then be the one to beat.

Example Round

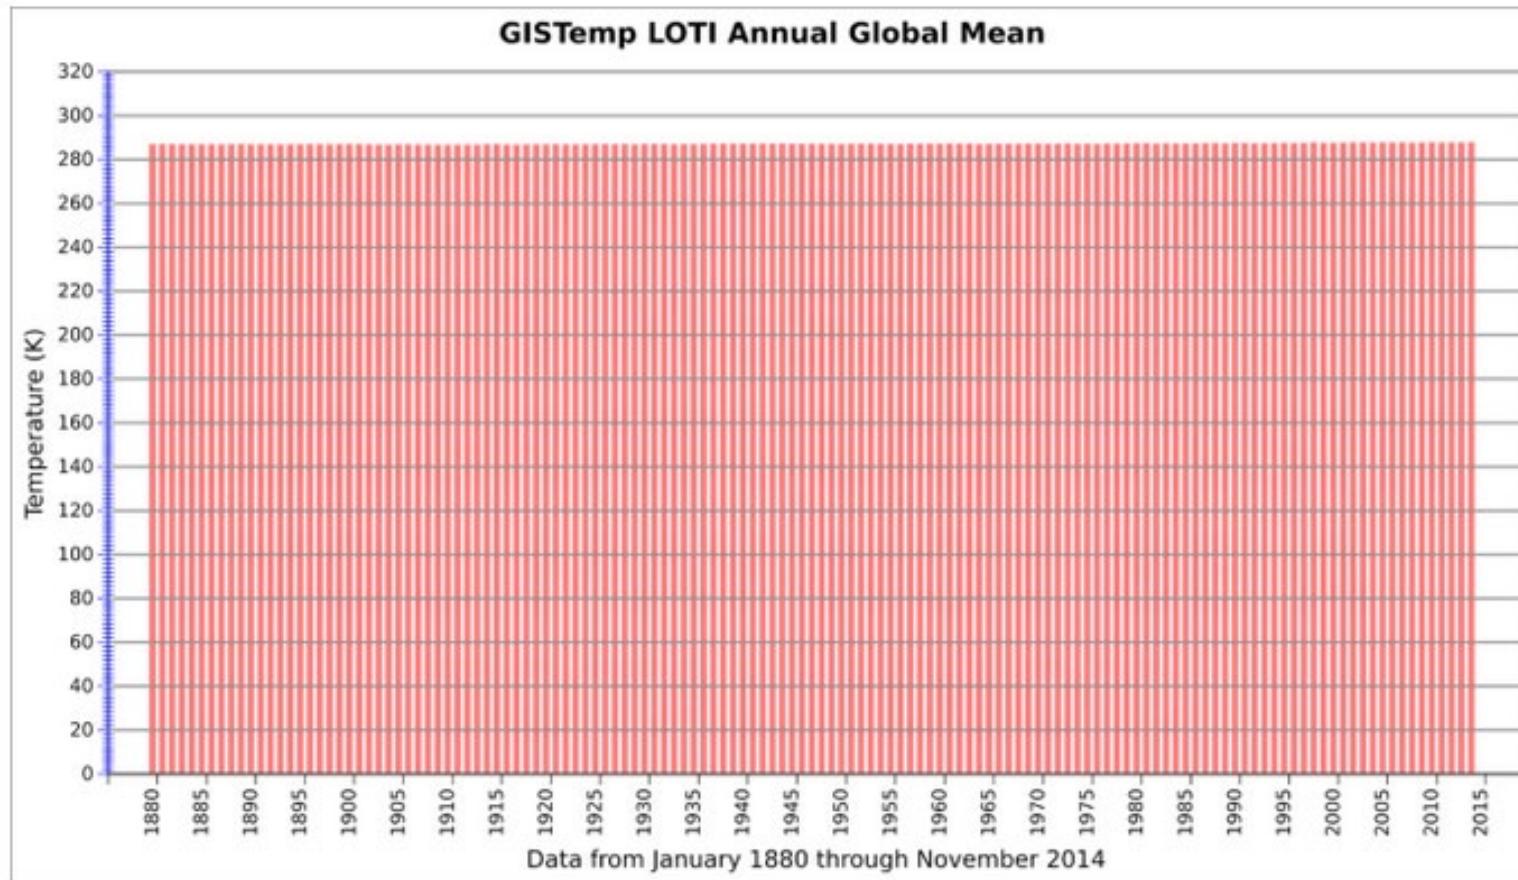

Submission 1

“Countries by Percent Indonesian Speakers”

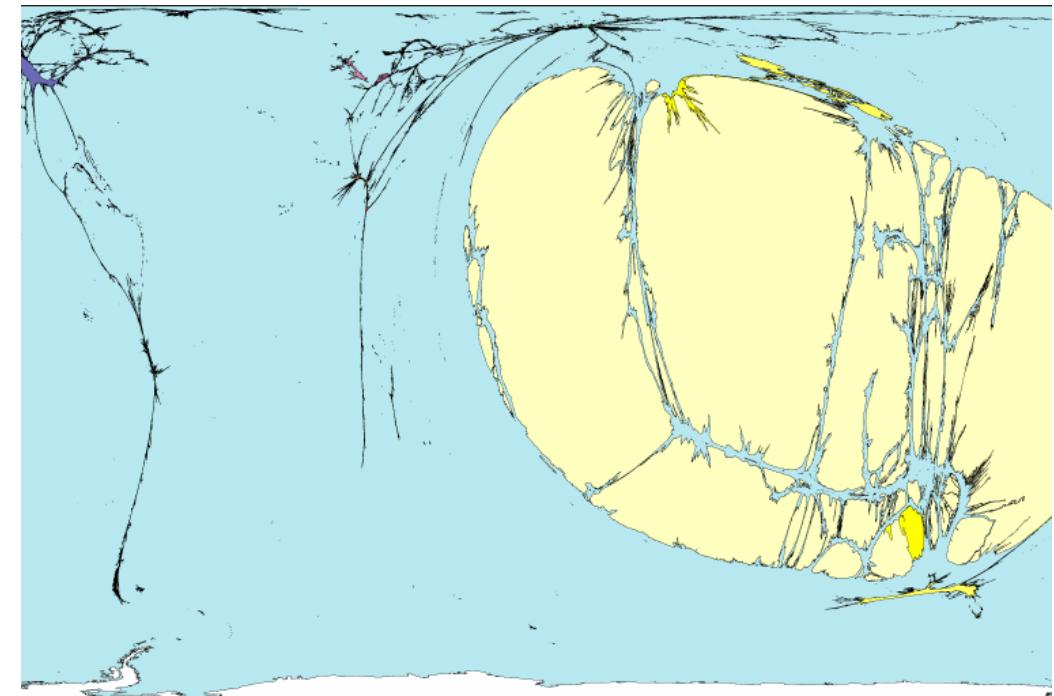

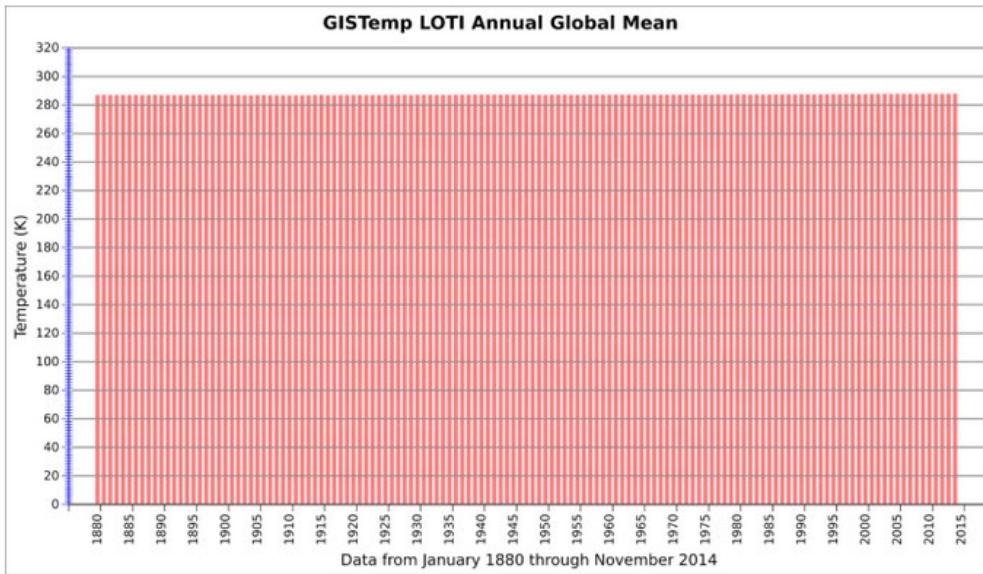

Submission 2

“Global Warming? What Global Warming?”

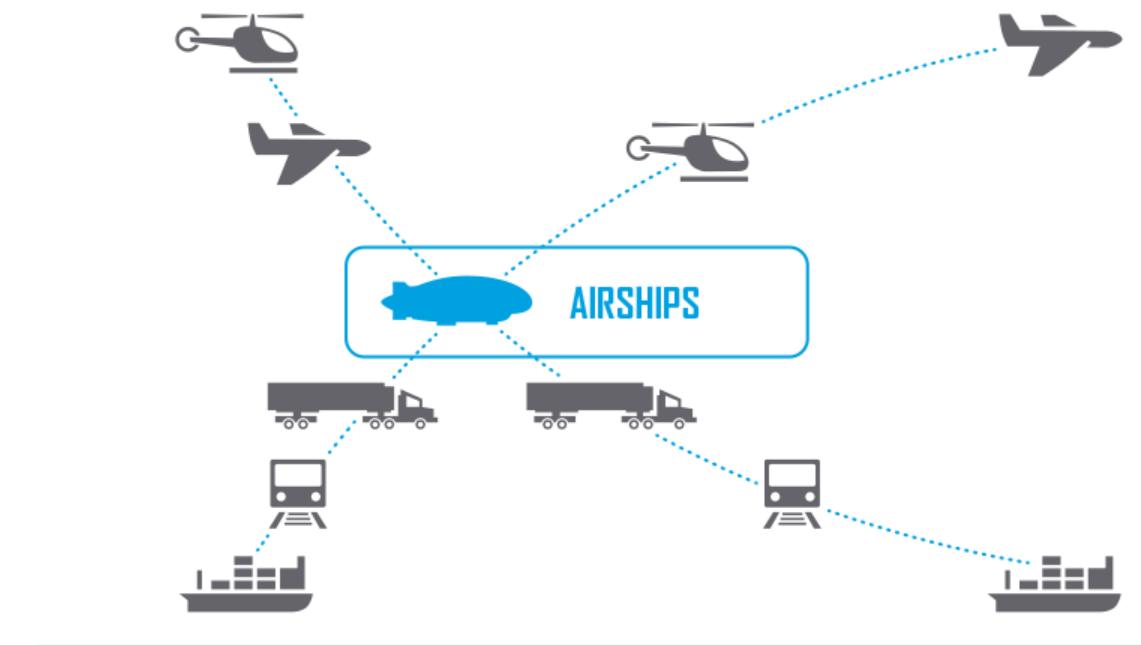

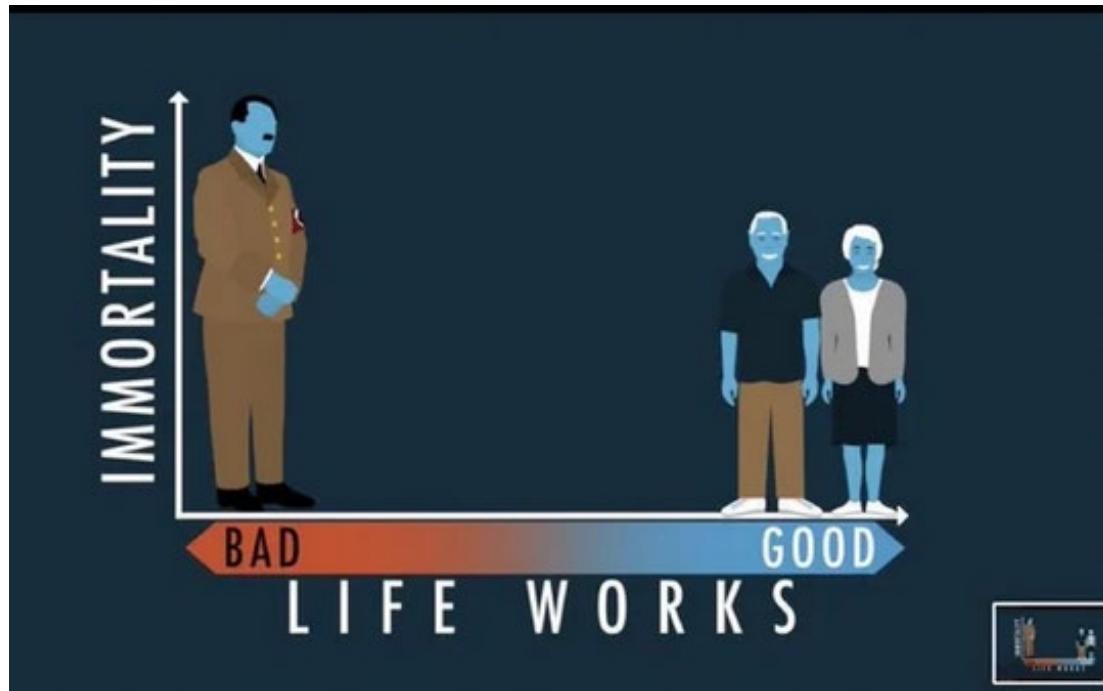

Which is the worst?

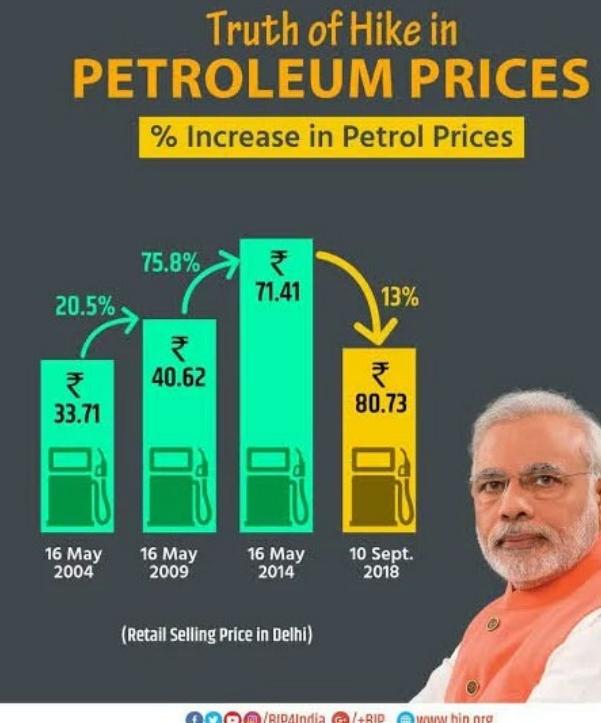

Some Ground Rules

#1: Must be actual data

Some Ground Rules

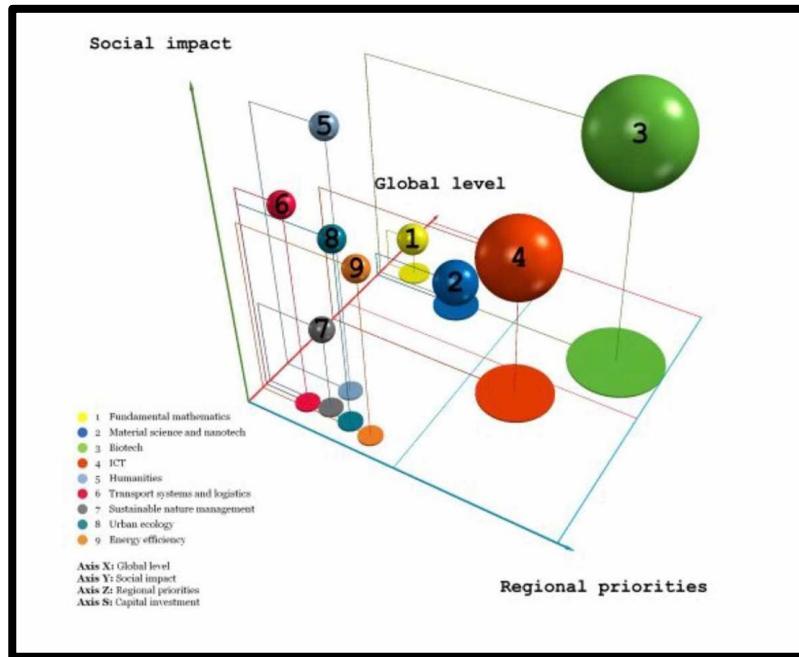

#2: Must be actually correct

Some Ground Rules

#3: Previous submissions are not allowed

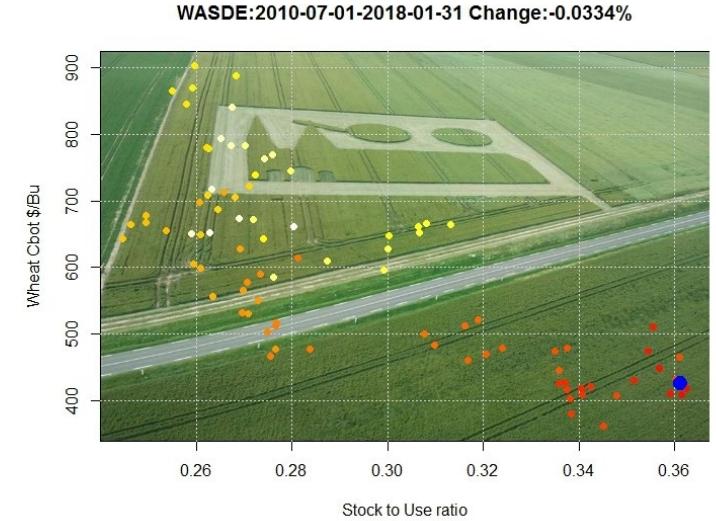

2021 Winner

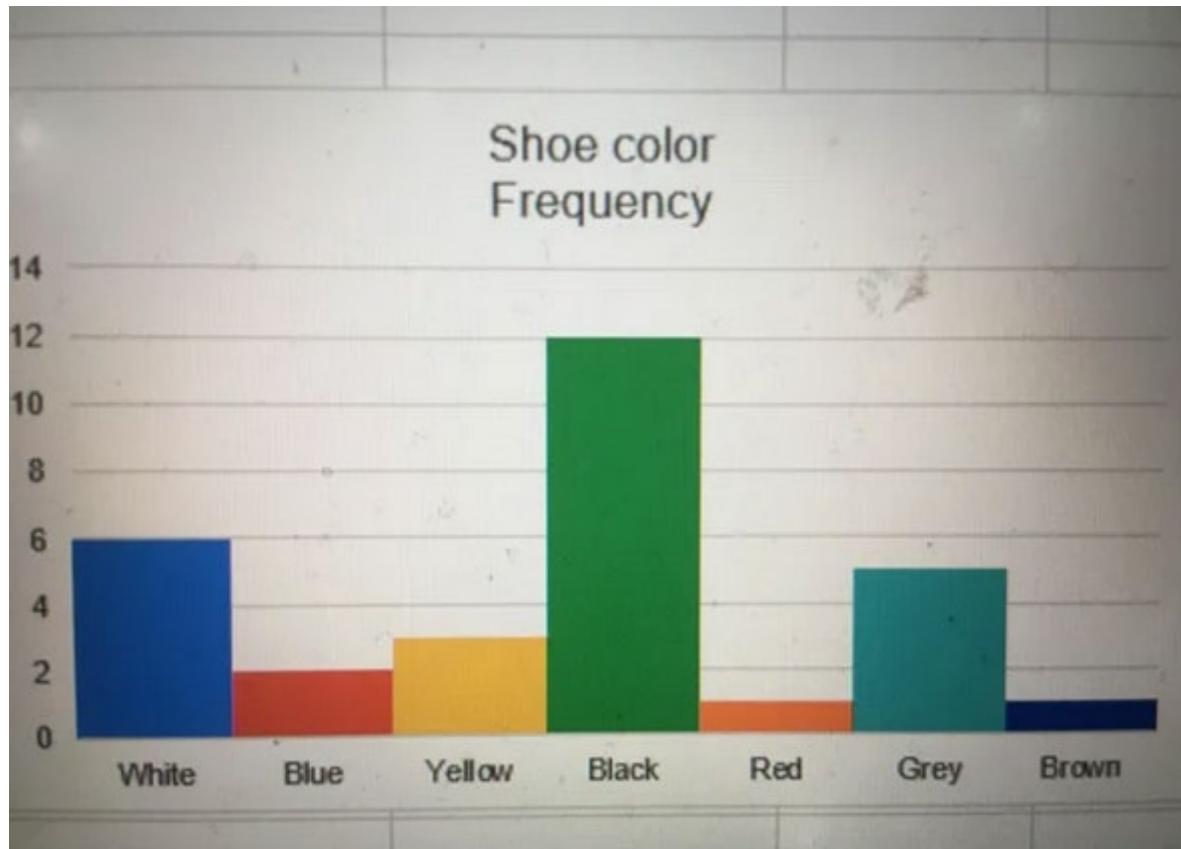

2022 Winner

2024 Winner
